

Buthuru Venkat Reddy

Mob.no: 6302561651 **EMail:** buthuruvenkatreddy@gmail.com

LinkedIn: <https://www.linkedin.com/in/venkatreddybuthuru/>

Github: <https://github.com/buthuruvenkatreddy>

Professional Summary:

Computer Science graduate with strong skills in **Data Structures & Algorithms**, and full-stack development using the **MERN** stack (MongoDB, Express.js, React.js, Node.js). Proficient in **Python** and **JavaScript**, with experience building scalable web applications, integrating **RESTful APIs**, and deploying cloud-based solutions. Seeking a Software Developer role to contribute to impactful real-world projects in an Agile environment.

Technical Skills:

Programming : Python, JavaScript, HTML, CSS

Frameworks / Libraries: React.js, Node.js, Express.js, TensorFlow, OpenCV, Keras

Databases: MongoDB, SQL

Tools: Git, Postman, Github, Cloudinary, Jupyter Notebook, VS Code

Concepts: Object-Oriented Programming, Data Structures & Algorithms, REST APIs, Low Level Design.

Internship- Embrizon Technologies:

Jun 2024 – August 2024

Role: Machine Learning Intern

- Built an image classification model using **Convolutional Neural Networks (CNN)** in **TensorFlow** and **Keras**
- Applied core Machine learning techniques such as **Transfer learning** and **data augmentation** to improve model performance
- Evaluated the model using metrics like **accuracy**, **precision**, **recall**, and **F1-score**
- Collaborated with the development team to deploy the ML model into a production pipeline using **Python APIs**

Projects:

1.Text-to-Image AI Generator (SaaS App) using MERN Stack

March 2025 - April 2025

Github: [Text to Image AI](#)

- Developed a full-stack SaaS application using **MongoDB**, **Express.js**, **React.js**, and **Node.js**
- Integrated Text-to-Image API to convert user input into AI-generated images
- Managed authentication, image storage with **Cloudinary**, and **API logging**
- Used **Postman** for testing and deployed to a cloud environment
- **Reduced loading** time by **20%**

Technologies: React, Node.js, Express.js, MongoDB, REST API, Cloudinary, Postman, JavaScript, HTML, CSS.

2. Real-Time Emotion Recognition

Jan 2024 - March 2024

Github: [Real Time Emotion](#)

- Built a real-time emotion detection system using **TensorFlow** and **OpenCV**
- Used CNN for face emotion classification from live webcam feed
- Integrated **GUI** for user interaction and real-time feedback

Technologies: Python, TensorFlow, OpenCV, CNN, Deep Learning, Machine Learning, Real-Time Processing.

Education:

B.Tech – Computer Science and Engineering

Alliance College of Engineering and Design, Bangalore

Graduation: May 2025 | Percentage: 68%

Achievements:

LeetCode: Solved 400+ problems, ranked in the top 10% globally.

Leetcode Profile: <https://leetcode.com/u/buthuruvenkat/>

Coursera Certification: Introduction to Web development with HTML, CSS, JavaScript

Certificate: <https://www.coursera.org/account/accomplishments/verify/WE85338K7VJ6>
